

Date: May 27, 2020

Subject: ISCR Lunch and Learn: May 2020

Indiana State Cancer Registry

Lunch & Learn Webcast

The next ISCR Lunch & Learn Webcast is scheduled to begin at **12:30 pm ET on Friday, May 29, 2020.**

The presentation for the May 2020 Lunch & Learn Webcast is titled “*How About This Case?*” and was created using three actual case scenarios as the basis for discussing various challenges with assigning stage and coding treatment in cancer registry abstracts. The materials included in this presentation are “Category A” topics. **CTRs viewing this presentation will earn 1-hour Category A CE credit.**

Live streaming of the May 2020 webcast will begin approximately 10 minutes before the scheduled start time; however, it will be streamed on a **different website** than previous webcasts. You are strongly encouraged to test your ability to view videos on the new website now to address any problems which would prevent you from viewing the live event. The new website is considered “**browser-friendly**” so you should be able to use your preferred internet browser, but a public WiFi connection should still be avoided given variable connection speeds and the risk of buffering problems.

Click this link to get to the [New ISDH webcast website](#), for both testing the system now and viewing the live webcast on Friday.

Handouts of the presentation slides and the case scenarios are currently available for you in the **Indiana FLccSC course** “Upcoming ISCR Lunch & Learn Handouts”. After the live webcast ends, a video recording of the presentation will be made available in a new course created for the May 2020 webcast. To obtain a CE certificate, you must complete the May 2020 FLccSC course by taking a very short quiz, regardless of how you view the presentation.
