Abstracting Tip

Diagnostic confirmation--Heme & Lymphoid Neoplasms: Is Diagnostic Confirmation coded to 5 or 8 based on a patient diagnosed as multiple myeloma by a physician based on a bone marrow biopsy stating plasma cell neoplasm?

This would be a Diagnostic Confirmation of 8 based on the physician's diagnosis.

The Pathology report mentions plasma cell neoplasm only. By itself, plasma cell neoplasm is not reportable because it includes a variety of diseases, some that are not reportable, and some that are (See Hematopoietic Database under Plasma Cell Neoplasm.)

The physician probably has other information, including imaging, which may show lytic lesions. He/she is probably using clinical findings, plus findings from the bone marrow, and diagnosing this patient with multiple myeloma. <https://seer.cancer.gov/seerinqury/index.php?page=view&id=20200045&type=q>

Other Education

NCRA Complimentary Webinar

The one-hour complimentary webinar, *Understanding Your Registry Database*, is Wednesday, February 24, at 2:00 PM ET. Karen Mason, MSc, RN, CTR, will address questions such as How well do you know your database? How is your data stored and moved? What are its limitations and what can you do with it? She will explore types of registry databases and how to interact with them to achieve the best results to the benefit of your registry. Mason will also discuss database terms and language to improve communications with database vendors and harness the power of your data. The webinar does not earn CEs. The webinar is complimentary, but [registration is required](#).

Breast SSDI Quiz

<https://testmoz.com/q/7924040>

Passcode for both quizzes-0626

Results of quizzes will be shared in March Educational Email Blast

Link to quizzes will be active till Feb. 23, 2021

New NCRA Mini-Learning Short Posted on Follow-Up

Juliet Wilkins, MA, CTR, Education Committee member, discusses the follow-up process and its relation to accurate data in the registry record. Differences in terminology used by physicians and cancer registrars will be addressed, and examples to illustrate the differences in the definitions between recurrence of a disease and disease-free will be presented. NCRA mini-learning shorts are located on the Center for Cancer

Registry Education, NCRA's learning management systems. [Learn more](#).
