NAACCR Webinar - **Kidney 2021** - June 2021

Abstracting Tips

Question: 20210020 (Sinq)

Behavior--Breast: Should the behavior change to /3, invasive, to get a case to clear edits? The histology of this breast case is ductal carcinoma in situ (DCIS), 8500/2. Lymph nodes are positive for micro-Mets (0.2 mm-2 mm). SEER Summary Stage: 3, regional lymph nodes positive. This creates an edit for SEER Summary Stage due to the behavior code of /2, in situ.

Answer

Code the behavior to /3, not just to pass edits, but because this is an invasive case based on the positive lymph nodes.

For most cases, behavior is based on the primary tumor, but in situations like this where an invasive component cannot be found and there are positive lymph nodes, the /3 behavior is assigned based on the positive lymph nodes.

IORT Delivery Technology & Coding

IORT FOR BREAST CANCER, Volume: 41 - Partial Breast. Lymph Nodes are not Targeted!

No CE's

NPCR-Site Specific Male GU-May 2021

NPCR-Site Specific Colon-May 2021

IDOH-Colon SSDI's and Case Examples-June 2021

Vaginal Cuff Brachytherapy Ir-192

Vaginal Cuff Brachytherapy Ir-192

Treatment Modality 09-Brachytherapy, intracavitary, HDR

Planning Technique 88-NA

Treatment Volume 72-Vagina

Radiation to draining lymph nodes 00-No
Radiation to draining lymph nodes

Webinar Recordings

Himagine Webinar

Himagine has posted two webinar recordings on Breast cancer from February and April 2021. If you would like to listen to these recordings click on the link provided below.

No CE's are provided for listening to recordings. However, you can get CE's for attending the live Webinars. Upcoming Tumor Talks can be found here, too.
