Beyond the Cancer Registry: The Value of CTR Skills

CTRs have invested in a lot of education and have given a lot of energy to develop and hone the skills needed to be successful in the field of cancer registry and cancer surveillance. Our expert panel will discuss options for cancer registrars with the knowledge, skills, and abilities (KSAs) that they have mastered in the field of cancer registry, which would be appropriate for positions other than those in a hospital registry.

Panel: Ronda Broome, MS, CTR (Informatics);

Cari Vida, RHIA, CTR (Consulting & Education)

Cathryn Phillips, CTR (Central Registry)
